

Placement in English programs has never been faster. Lexica provides valid, reliable data to help place incoming students quickly. Delivered on computer, tablet, or mobile, instantly scored and fun to use, Lexica makes placement decisions easy.

Lexica is based on an innovative and well-researched model for quickly estimating general language proficiency. It is designed to inform initial placement or

hiring decisions for native speakers of Arabic, Spanish, Mandarin and others who are learning English as a foreign language. It can also be used as an ongoing measurement of progress in vocabulary growth. Designed with a bilingual interface, all instructions are in the native language, making the test accessible to beginning learners.

Lexica Features:

- 🕒 Web-based
- 🕒 Takes just 10 minutes
- 🕒 Instant results
- 🕒 Computer adaptive
- 🕒 Accurate and reliable
- 🕒 Bilingual interface
- 🕒 CEFR-based placement recommendations

Fast & Easy to Use

Whether taken on a computer or a mobile device, the test takes just 10 minutes with results available immediately upon completion. Results are reported as vocabulary level scores linked to corpus-based word frequency ranges with cut points aligned to initial placement recommendations of the Common European Framework of Reference (CEFR).

Built for Education and Workforce

Lexica has a broad application across the full range of educational institutions and corporate HR departments where placement decisions need to be made on entry into an English-medium environment. Quick, easy to administer and affordable, Lexica will give administrators reliable data to estimate an applicant's general proficiency in English.
